Survey Overview

Survey results from September 23 – December 31,
2016

Total survey participants 10,437

61% Responded "Not able to purchase broadband
speed needed"

15.9% Responded "I can't get wireline service"

Provider Availability

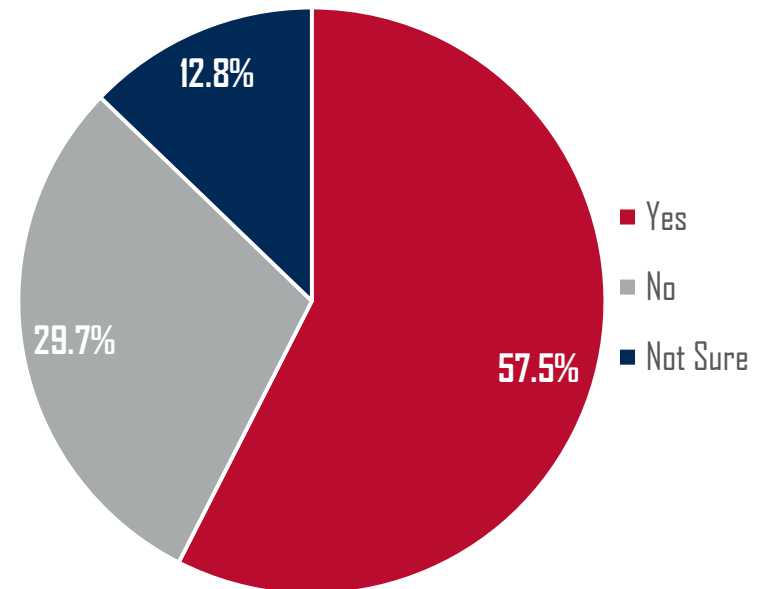

The Georgia Rural Broadband Survey locates survey respondents based upon their addresses.

Provider service availability is based upon the data provided to the Federal government in December 2014.

This chart represents survey responses to 11,733 times that broadband providers were presented as available.

While some respondents were presented with multiple providers, 3,560 respondents were only presented with one provider.

Responses to Provider Availability

Service Sufficiency

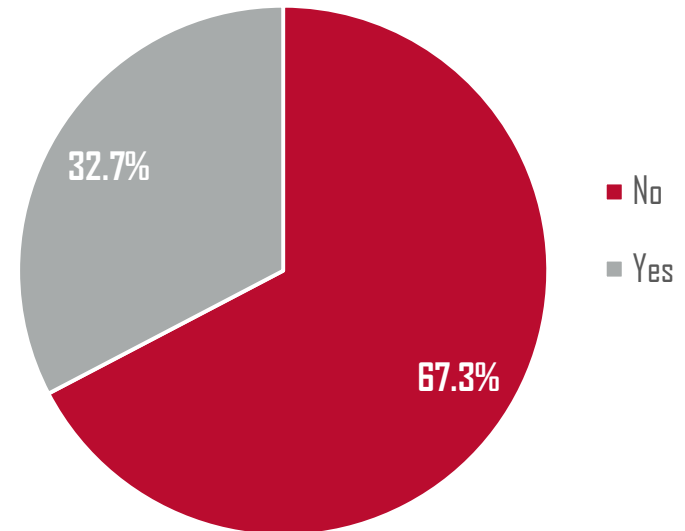

Respondents were asked if they subscribe to one of the providers presented to them as available.

5,885 respondents indicated they subscribed to the presented service.

575 respondents did not provide an answer.

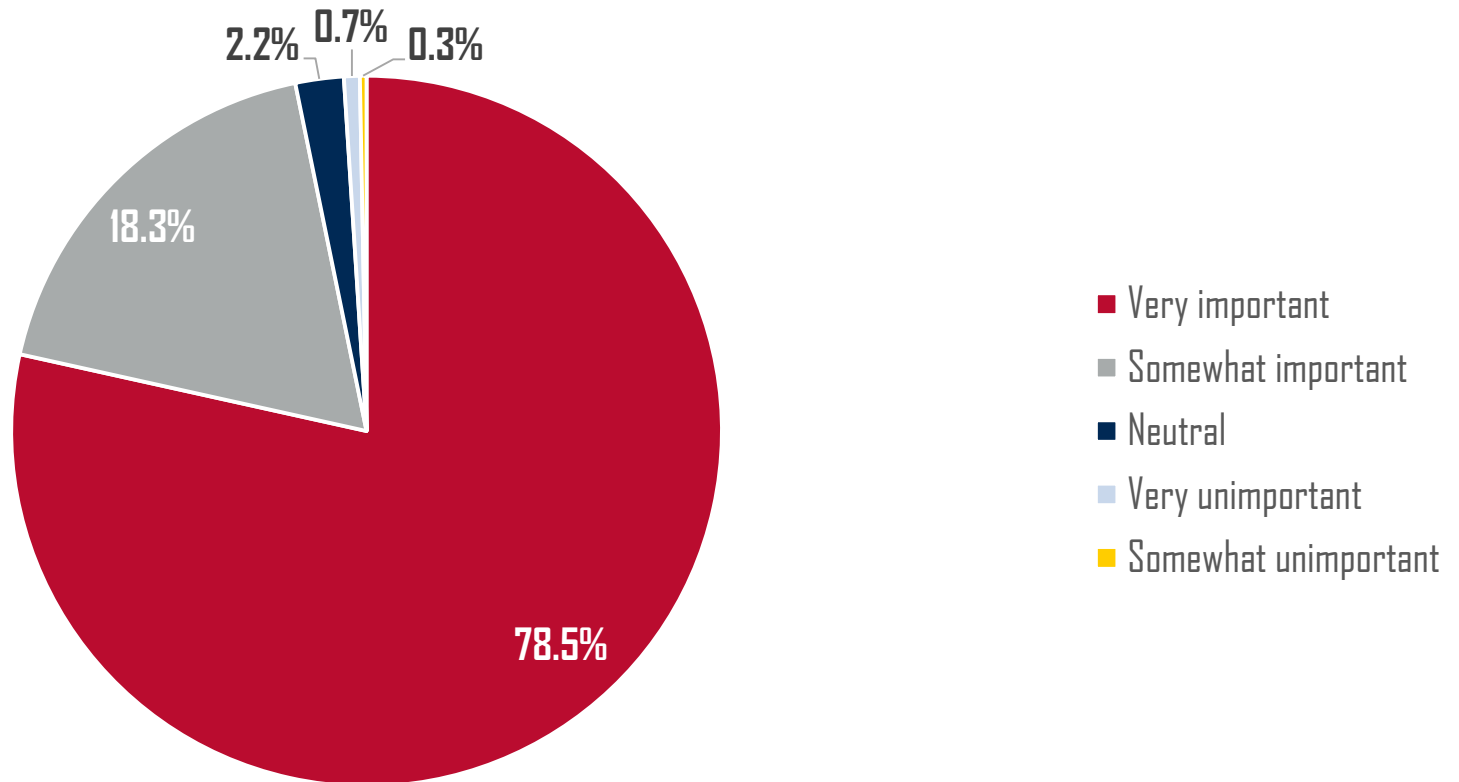

5,310 responded on the sufficiency of the service.

Is service sufficient?
